

Introduction to Our Education Programme

The education programme was established as a very small and humble beginning with only a few teachers. At this stage Alhamdulillah we have moved on and progressed little by little, however there is still much to be done to reach our goal insha Allah. We thank Allah Almighty for helping us progress on from where we began.

We thank all those members of staff who worked so hard at the beginning, May Allah Almighty reward each and every one, who has contributed to the progression of the education and teaching and learning of Madrassah Abu Huraira, both in the past and present and may Allah continue to help those who continue to diligently work to reach our goal.

We strive to provide an Islamic education for the young supporting our Muslims families in the local community. We do this by providing a basic and comprehensive Islamic education that will nurture our young to grow up and become upright human beings, who follow Islam, true to their faith and who can positively contribute to the society they are born or live in as Muslims. At the same time we strive to create a sense of self-respect and respect of the world around them, people who can live in peace and harmony amongst those of other faiths and traditions and work with them to enhance the way of life we share as citizens in one country

The objectives of the programme are:

1. To educate the young members of our communities in their cultural and religious heritage.
2. To provide knowledge to our children through the teachings of Islam, to become moral, upright citizens of *their* British society **as a Muslim** and how to contribute to their society positively.
3. To provide an excellent program of study to enhance the learning and understanding of our young that will help them make moral, positive and informed choices.
4. To engage the parents of our children to participate more in educating their children, in order to create a community who are actively and positively participating in the society, as a whole.
5. We strive to work professionally to reach our goal of becoming a centre of excellence in teaching and Learning Arabic & Islamic Studies for British Muslims, working towards creating a healthier British society for all citizens.

Our mission Statement

We endeavour to create and maintain a professional attitude and atmosphere in our goal of becoming a centre of excellence in teaching and learning Arabic and Islamic Studies. We work towards creating a balanced understanding of Islam. We work to generate moral, upright human beings contributing to a healthier British society in which Muslims are an active participant; we also work to foster good relations between cultures to bridge the gaps.
